EDUCATION

Iowa State University

Bachelor of Science, Software Engineering | Minors: AI + CS
Activities: Phi Gamma Delta (Social Chair) • AI & ML Club • Robotics Club • Wrestling Club
Honors: Dean's List (Fall 2023)

Ames, IA

Aug 2023 - Dec 2027

EXPERIENCE

Lenovo

May 2026 - Jul 2026

AI Reliability & DevOps Intern | Qira AI Platform

- Designed and implemented **5 production agentic-AI quality signals in Rust**, enabling P50/P95/P99 monitoring of retry storms, clarification rate, tool-call depth, execution latency, and task success across Qira's cross-platform AI runtime.
- Built cloud-to-local LLM fallback telemetry and alerting across iOS, Android, and Windows, reducing Azure AI Foundry outage detection time by **80%**.
- Architected a thread-safe OpenTelemetry configuration hot-reload system in Rust using Azure App Configuration, reducing collector endpoint updates from a multi-day release cycle to **under 60 seconds** without requiring a new application release.
- Led end-to-end reliability engineering across **6 AI experiences and 3 partnership integrations**, driving **23 instrumentation requirements** into production and enabling a core AI workflow's P95 latency to improve by approximately **65%**.
- Led the investigation and remediation of **8 Expedia integration defects**, helping implement, review, and ship **6 production fixes and 3 alerts** while isolating partner-side degradation that reduced flight P95 latency by **51%**.

Berkley Technology Services

May 2025 - Apr 2026

Site Reliability Engineering Intern & Co-op

- Designed a reliability framework across **5+ environments and 25+ service dependencies**, translating Tier-0 application flows into measurable SLIs and helping reduce mean time to resolution by **20%** through dependency-aware triage.
- Redesigned AppDynamics monitoring for a critical insurance platform, partnering with reliability teams to reduce alert noise by **70%+** and focus incident response on actionable failure signals.
- Built Ansible automation and CI/CD workflows that reduced manual operational effort by **50%** and configuration drift by **80%**.
- Engineered credential-rotation automation integrating Active Directory and Delinea for **500+ service accounts**, maintaining **100% audit compliance**.

Freelance Web Developer

Mar 2025 - Present

N&M Landscaping LLC | DT Group LLC

N&M Landscaping LLC: Built and deployed a React, TypeScript, and Supabase booking platform that lets customers explore services and submit quote or job requests, increasing client acquisition by **40%**.

DT Group LLC: Improved search visibility and crawl reliability by restructuring metadata, XML sitemaps, indexing rules, and technical SEO configuration.

PROJECTS

MatVision: AI Wrestling Film Intelligence | Python, PyTorch, OpenCV, FastAPI, Next.js

Summer 2026

- Built an evidence-grounded wrestling film intelligence platform using athlete tracking, pose estimation, and temporal event detection to generate match statistics, automated clips, and timestamped coaching feedback.

FaultLine: AI Incident-Response Evaluation Arena | Rust, Python, LangGraph, OpenTelemetry

Summer 2026

- Developed a reproducible AI incident-response evaluation arena using Rust microservices, LangGraph agents, MCP-gated tools, and OpenTelemetry to measure diagnosis accuracy, investigation efficiency, and remediation safety.

SKILLS

Languages: Rust, Python, Java, C#, C/C++, TypeScript, JavaScript, SQL, PowerShell

Backend & Systems: FastAPI, React, Next.js, REST APIs, Redis, DuckDB, Distributed Systems, Event-Driven Systems, Linux

AI & ML: PyTorch, Scikit-learn, LightGBM, OpenCV, LangGraph, LangChain, Agentic AI, RAG, MCP, Feature Engineering

Cloud & Infrastructure: Azure, AWS, Docker, Kubernetes, Terraform, Ansible, CI/CD, GitHub Actions

Observability: OpenTelemetry, Prometheus, Grafana, Application Insights, KQL, AppDynamics, Datadog

Data: PostgreSQL, MongoDB, Supabase, Firebase
